

## EX. No.: 10

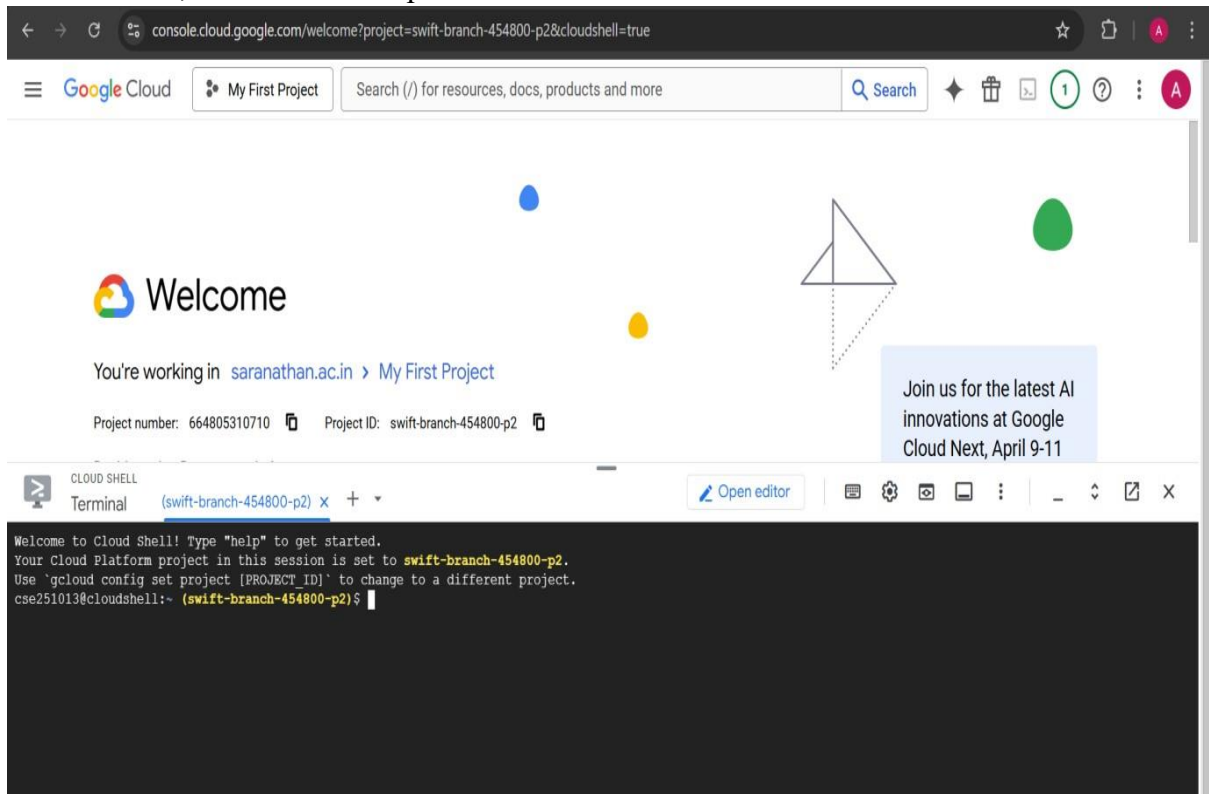

## Use GAE Launcher to Launch the Web Application - Prime Number Checker

### Procedure:

Step 1: Search Google Cloud Platform. Create a google cloud account. Click cloud console. Dashboard will open. Click agree and continue.

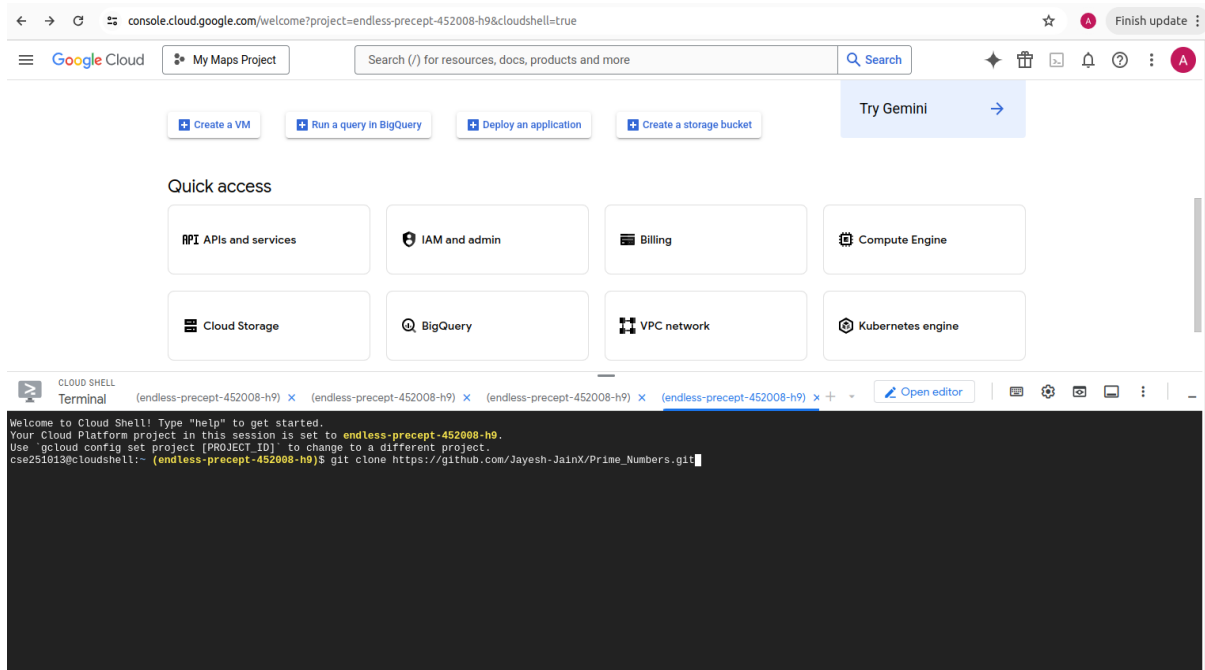

Step 2: On right side of window, click Activate cloud shell. Then click continue and authorize, a terminal will open.

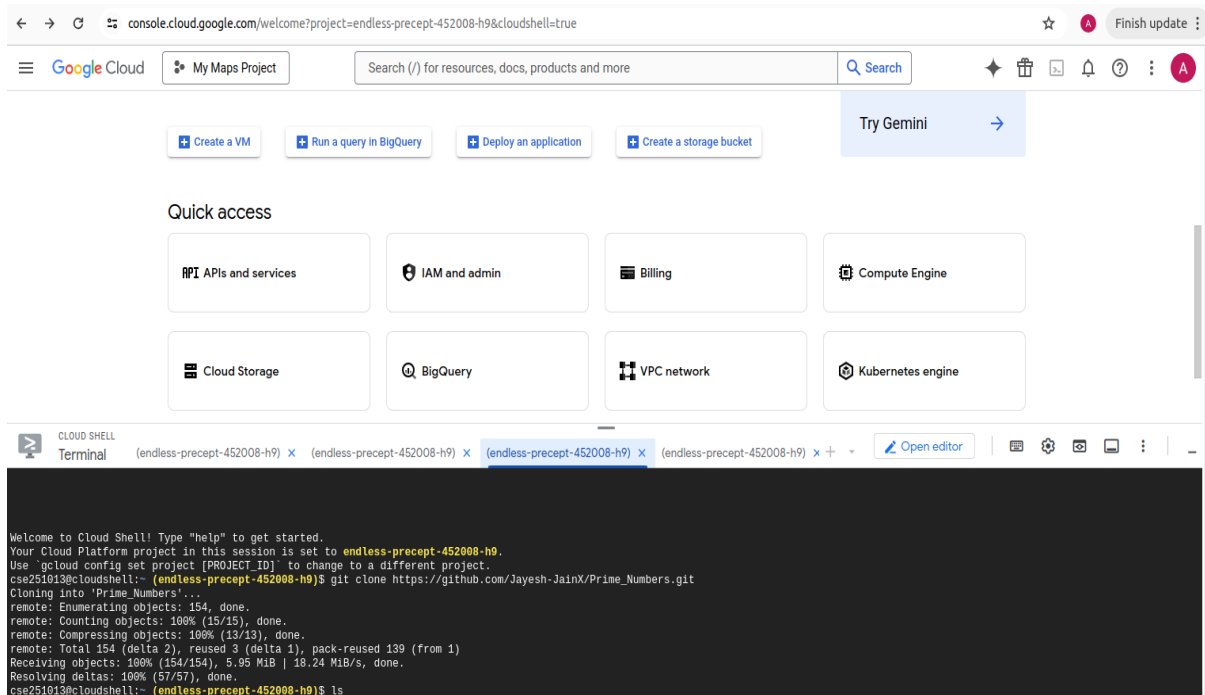

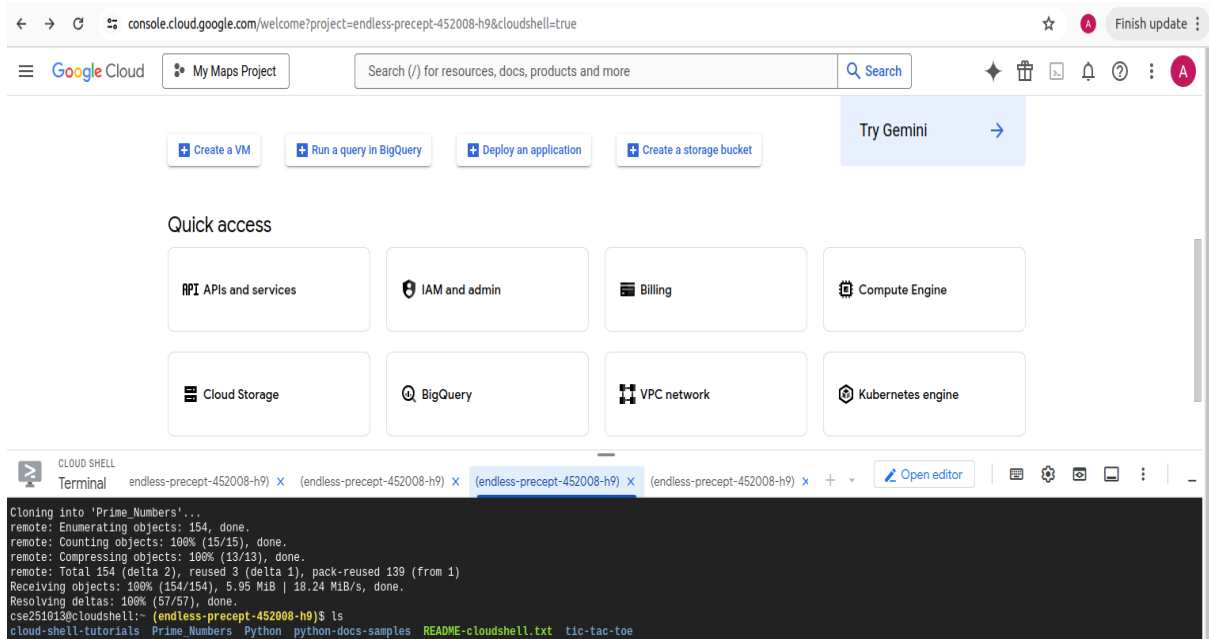

Step 3: Create a new python project. Clone python using git. In cloud shell,

\$ git clone [https://github.com/Jayesh-JainX/Prime\\_Numbers.git](https://github.com/Jayesh-JainX/Prime_Numbers.git)

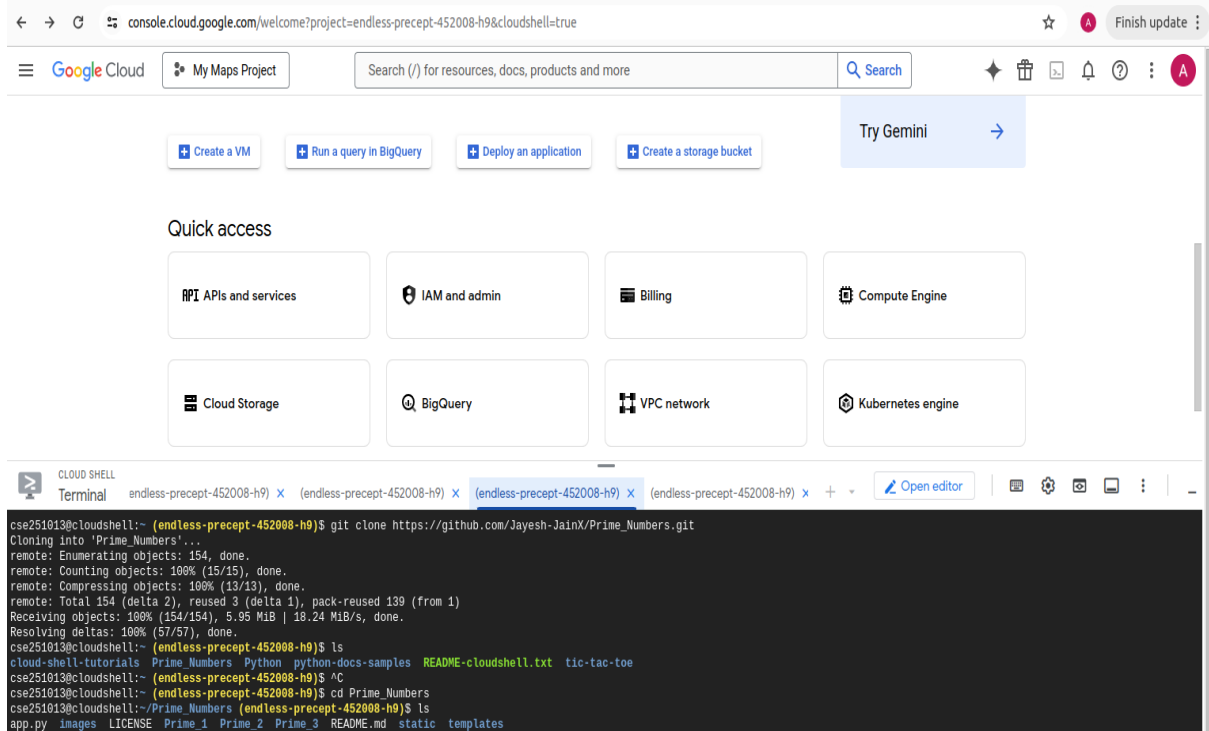

Step 4: Type the command ls to view the files in the git.

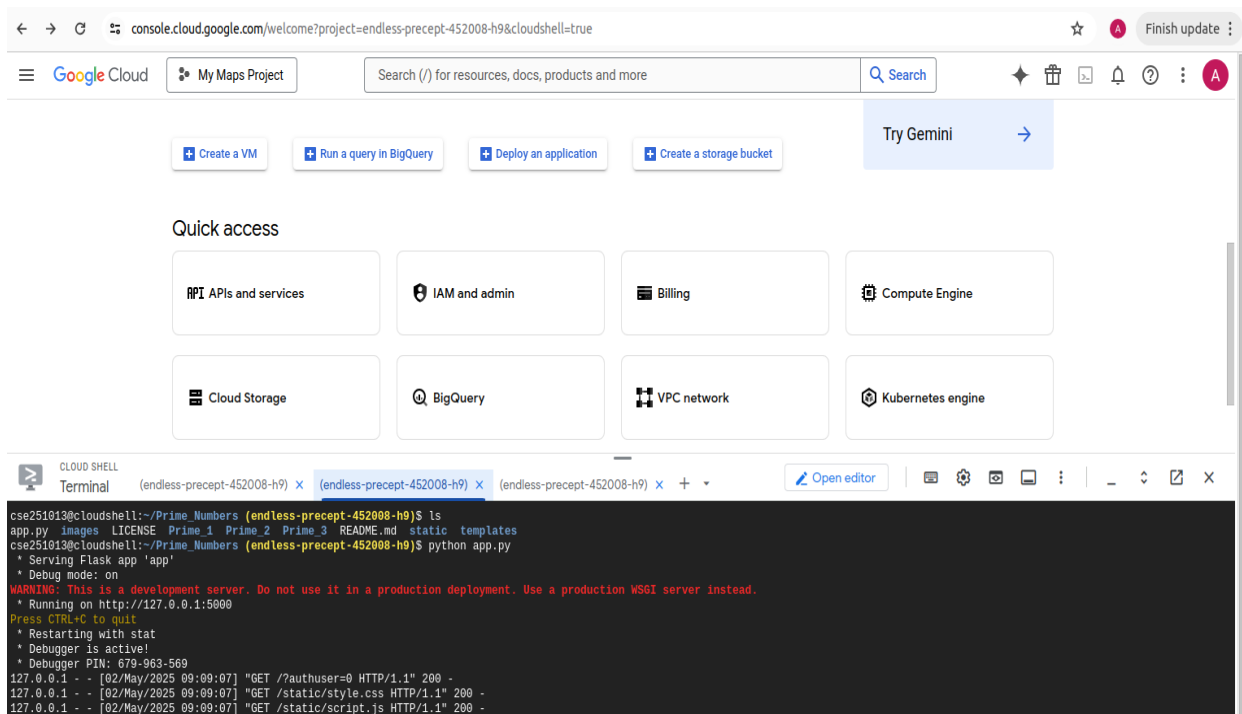

## Step 5: Navigate to Prime\_Numbers \$ cd Prime\_Numbers

```
$ python app.py
```

Step 8: On port 5000, we can view the deployed app Prime Number Checker.
